DETAILED ACTION

Election/Restrictions

Claims 1-22 are allowable. The restriction requirement between Groups I-IV, as set forth in the Office action mailed on 23 May 2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 23 and 24, directed to a ready-to-use bleaching composition; claims 25-28, directed to a process for bleaching; and claims 29-32, directed to a multi-compartment device are no longer withdrawn from consideration because the claims require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-32 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art, U.S. Patent No. 6,540,791 ("Dias"), teaches polydecene within a list of hydrocarbon oils, without exemplifying a composition containing polydecene or providing a motivation to select polydecene from the disclosed list. Further, Dias does not disclose a composition comprising 15% to 35% by weight of at least one polydecene or a water content less than 1% by weight relative to the total weight of the composition. The secondary reference U.S. Patent No. 6,260,556 ("Legrand") does teach an anhydrous composition, however does not teach use of a polydecene. The secondary reference U.S. Patent No. 5,578,299 ("Starch") teaches polydecene compounds of up to 40 carbons (see col. 3, lines 10 and 15), however, not in a composition that has a water content less than 1% by weight relative to the total weight of the composition. Finally, the composition disclosed by secondary reference U.S. Patent No. 6,423,306 ("Caes") does not have a water content less than 1% by weight relative to the total weight of the composition, and does not contain polydecene.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
